**This page applies only to properties having a private drinking water source.
(Well or Cistern)**

Per the Johnson County Sanitary Code, Chapter 3, Article 3, Section 5 C (page 73) JCDHE shall evaluate the condition of the well and well water.

For properties with a private drinking water source, resale inspections will only be scheduled Monday - Thursday due to lab testing hours. Inspections would take place by 9 am due to water testing requirements. Well water testing happens in conjunction with the septic resale inspection.

Well Water Testing Price List

Which water tests does the **buyer's lender require** to underwrite the loan? Check option below.

___	Option 1	(Nitrate/Total Coliform)	\$72
___	Option 2	(Nitrate/Nitrite/Total Coliform)	\$108
___	Option 3	(Nitrate/Nitrite/Total Coliform & Lead)	\$177

*According to CDC Guidelines, lead testing is recommended only for homes built before 1978.

- Should the private well/cistern water testing not meet standard parameters, then assessment and repairs would be required.
- Should repairs be required, a well/cistern repair application must be submitted to this office and second site visit would be required with an associated fee of \$80.
- After repairs are complete, water must be retested at the second site visit, and the above water testing costs would apply to a retest.
- All fees must be paid in advance through our office by calling 913-715-6905.
